Mr. Alan Macy
513 Garden Street
Santa Barbara, CA 93101

Dear Alan,

We wish to express our unqualified support for your plans to build the Santa Barbara Center for Art, Science and Technology at 513 Garden street adjacent to our property and business at 519 Garden Street. Our company, HiFi Club, has been designing and installing fine home electronics systems, including home theaters and home automation, for 22 years. As a formally trained musician and artist, we have worked hard to make our company more than a work place. We avidly support the arts and sciences in the local schools and contribute financially and with our time to the Built Green Resource Center, Art From Scrap, the Santa Barbara Contemporary Arts Forum, the Kavli Institute of Theoretical Physics at UCSB, and Santa Barbara City College Art Department. We have a fine art collection in our offices and each have a private art collection at home. Your project will enhance this still-rough neighborhood without dehumanizing it and your focus on green building and green practices in the workplace aligns with our personal efforts in many ways. We hope to make a passageway between our properties and participate with the Center in meaningful ways in the years to come.

Welcome to the neighborhood!

Regards,

Hans Betzholtz, President

Elaine LeVasseur, Vice President
