

# ARCHITECTURAL FOUNDATION OF SANTA BARBARA 2016 Scholarship Reception & Awards Ceremony at SBCAST

## SB Center for Art, Science & Technology (SBCAST)

SBCAST is an innovative net zero energy use development that was creatively envisioned, designed, by Macy Architects of San Francisco, and realized to meet many of the challenges to sustainable living in the 21st Century! SBCAST embraces all the important elements of community benefit: aesthetics, durability, functionality, low maintenance, and conservation of energy, water, and materials. These key components are brilliantly incorporated into the building and site design in a way that transforms a formerly run down site into a vibrant Center supporting the imaginative mix of Art, Science, & Technology.

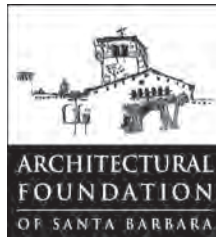

# ARCHITECTURAL FOUNDATION OF SANTA BARBARA
